

Second Life for Fresh Christmas Trees After the Holidays

Give a second life to your fresh cut tree after the holidays. Live cut trees will be recycled into mulch at no cost to Oldham County residents as the holidays come to a close. *Please, no artificial trees or live trees with a root ball.*

For every five trees recycled, approximately 35 pounds of mulch can be created to help nourish new plant and tree growth. The Oldham County Road Department will grind the trees and the mulch will be used for parks trails and landscape beds throughout the County.

Individuals can take their cut tree thru January 31 to the Oldham County Recycling Center located at 3943 Jones Drive across from Oldham County High School. Trees may be dropped in the gravel parking lot below the Center.
